

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently amended) A concentrate consisting of: ~~Concentrate comprising~~
an active substance selected from the group consisting of, ~~which includes~~ an algae oil, an essential oil, a terpene, phosphatidylserine, an ω -3 fatty acid, lanolin, a linoleic acid glyceride, citral or tee tree oil, and
a surplus amount of a polysorbate, wherein the ratio of active substance to polysorbate is no greater than 3:7 by weight ~~with at least two and half times the weight of the active substance,~~
wherein the active agent is micelled such that the individual micelles have a size not greater than about 40 nm.

2.-18. (Cancelled)

19. (Withdrawn and amended) A method ~~Method~~ for preparation of a concentrate according to claim 1, in which the active substance is mixed with a surplus of polysorbate ~~polysorbates 80 or polysorbate 20~~ ~~with at least two and half times the weight of the active ingredient~~ until a clear mixture is obtained.

20. (Cancelled)

21. (Withdrawn and amended) ~~The method Method~~ according to claim 19, in which to order to accelerate the mixing process, the mixture is heated to a temperature of about 80°C to about 100°C.

22. (Withdrawn and amended) ~~Method~~ The method for preparation of a concentrate according to claim 37, in which the active substance is mixed with a surplus of polysorbate until a clear mixture is obtained ~~according to claim 19~~, in which glycerol is added to the mixture.

23. (Withdrawn and amended) ~~Method~~ The method for preparation of a concentrate according to claim 37, in which the active substance is mixed with a surplus of polysorbate until a clear mixture is obtained ~~according to claim 19~~, in which ethanol is added to the mixture.

24. (Cancelled)

25. (New) The concentrate according to claim 1, wherein the weight ratio of active substance to polysorbate is no greater than 2:5.

26. (New) The concentrate according to claim 1, wherein the weight ratio of active substance to polysorbates is no greater than 1:6.

27. (New) The concentrate according to claim 1, wherein the active substance is selected from the group consisting of algae oil, a terpene, phosphatidylserine, an ω -3 fatty acid, lanolin, and a linoleic acid glyceride, and the polysorbate is polysorbate 80.

28. (New) The concentrate according to claim 1, wherein the active ingredient is selected from the group consisting of an essential oil, tea tree oil, and citral, and the polysorbate is polysorbates 20.

29. (New) The concentrate according to claim 1, consisting of 16% by weight of algae oil and 84% by weight of polysorbate 80.

30. (New) The concentrate according to claim 1, consisting of 7% by weight of γ -terpenes and 93% by weight of polysorbates 80.

31. (New) The concentrate according to claim 1, consisting of 5% by weight of lanolin and 95% by weight of polysorbate 80.

32. (New) The concentrate according to claim 1, consisting of 5% by weight of conjugated linoleic acid triglyceride and 95% by weight of polysorbate 80.

33. (New) The concentrate according to claim 1, consisting of 10% by weight of an essential oil containing orange oil and 90% by weight of polysorbate 20.

34. (New) The concentrate according to claim 1, wherein the active ingredient is an essential oil and the polysorbates is polysorbate 20.

35. (New) The concentrate according to claim 1, consisting of 21% by weight of an ω -3 fatty acid containing animal fat and 79% by weight of polysorbate 80.

36. (New) The concentrate according to claim 1, consisting of 30% by weight of tea tree oil and 70% by weight of polysorbate 20.

37. (New): The concentrate according to claim 1, consisting of 14% by weight of citral and 86% by weight of polysorbate 20.

38. (New) A concentrate consisting of :

(i) an active substance selected from the group consisting of an algae oil, an essential oil, a terpene, phosphatidylserine, an ω -3 fatty acid, lanolin, a linoleic acid glyceride, citral or tea tree oil,

(ii) a surplus amount of a polysorbate, wherein the ratio of active substance to polysorbate is no greater than 3:7 by weight, and

(iii) a third component selected from the group consisting of glycerol and ethanol, wherein the active agent is micelled such that the individual micelles have a size not greater than about 40 nm.

39. (New) The concentrate according to claim 38, wherein the third component is glycerol content.

40. (New) The concentrate according to claim 38, wherein the third component is ethanol.

41. (New) The concentrate according to claim 39, consisting of 15% by weight of phosphatidylserine, 60% by weight of polysorbate 80, and 25% by weight of glycerol.

42. (New) The concentrate according to claim 39, consisting of 8% by weight of phosphatidylserine, 51% by weight of polysorbate 80, and 41% by weight of glycerol.

43. (New) The concentrate according to claim 40, consisting of 43% by weight of polysorbate 20, about 7% by weight of citral, and about 50% by weight of ethanol.
